MassHealth Mission Statement

To improve the health outcomes of our diverse members and their families by providing access to integrated member-centric health care services that sustainably promote equitable health, well-being, and independence.

Medicaid 101

What is Medicaid?

- Medicaid provides health coverage to millions of Americans, including eligible adults, children, families, seniors, and people with disabilities.
- In Massachusetts, Medicaid and the Children's Health Insurance Program (CHIP) collectively are referred to as **MassHealth**.
- Medicaid should not be confused with Medicare.

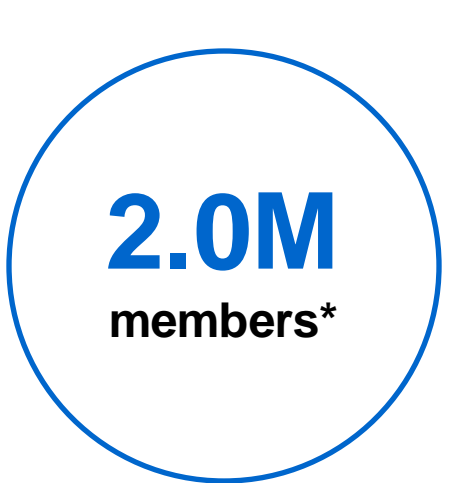

How does Medicaid operate?

- Medicaid is administered by states according to federal requirements established by federal law and the **Centers for Medicare & Medicaid Services (CMS)**.
- CMS is a federal agency that oversees MassHealth.
- The federal government shares the cost of Medicaid programs with states.
- CMS needs to approve how states administer their Medicaid programs, including what services are covered.

MassHealth Enrollment (as of March 2024)

MassHealth Accountable Care Organization (ACO) Overview (1/2)

MassHealth **Accountable Care Organizations (ACOs)** are health plans that are rewarded for value – better health outcomes and lower cost – instead of volume. There are 17 different MassHealth ACOs.

Each ACO:

- ✓ Serve members under 65 who are not also enrolled in Medicare or other insurance.
- ✓ Has a network of primary care providers, hospitals, specialists and other health care providers that coordinate all of a member's health care needs
- ✓ Contracts with MassHealth to serve specific Service Areas (*see Slides 12, 23, and 24 for more information on Service Areas*)
- ✓ Works to strengthen members' relationships with their primary care providers, who engage members in their care and help them navigate all the services they need
- ✓ Focuses on better coordinating care and engaging members in their care to improve health outcomes and reduce preventable utilization and costs (e.g., avoidable hospitalizations)
- ✓ **Has participated in Flexible Services, providing funds to community-based organizations to assist members with housing and nutrition services**

Framework for Health-Related Social Needs (HRSN) Services

2020: Flexible Services Program (FSP) launched to support certain eligible MassHealth ACO members experiencing nutrition insecurity, members who are at risk of homelessness, or members experiencing homelessness by providing nutrition and housing services.

2022: CMS approved a five-year \$67.2 billion MassHealth Section 1115 demonstration. The 1115 demonstration has been a critical tool in enabling Massachusetts **to continue the path of restructuring; make reforms and investments in primary care, behavioral health and -universal coverage**. The new approval has been effective since October 1, 2022, and will run through December 31, 2027.

2023: Implemented or expanded three Specialized Community Supports Programs (Specialized CSPs) addressing homelessness, housing instability, and justice involvement.

- **Specialized CSP for Homeless Individuals (CSP-HI):** pre-tenancy and tenancy sustaining services for members who are (1) chronically homeless; or (2) homeless and frequent users of acute MassHealth services. Specialized CSP-HI builds upon the previous Specialized CSP for
